Be part of the SUSTAIN consortium!

Collaborate, align efforts and help build an inclusive industry wide solution for palm oil traceability and sustainability

BLOCKCHAIN

SUSTAIN is an alliance that aims to:

1 Improve data collection and communicate progress on NDPE policy compliance.

2 Work towards greater smallholder inclusion in the supply chain of sustainable palm oil

3 Avoid duplication of efforts and resources through an integrated collaborative system built on blockchain.

SUSTAIN is utilizing blockchain platform to address NDPE progress and smallholder incentivization.

SUSTAIN will go live with Proof Of Concept (POC) in SE Asia in 2020 – establishing a practical FFB traceability system combining incentivization and inclusion efforts for smallholders.

✔ **SUSTAIN** consists consortium of palm oil producers, technical service organisations, palm product buyers, system and technology providers and other interested parties (the network).

✔ **SUSTAIN** is convinced that the collective power of the network made up of palm oil industry players offer one of the best solutions for palm oil traceability and sustainability.

✔ **SUSTAIN** aims to build in support for small farmers in meeting NDPE requirements and improving market access.

✔ **SUSTAIN** aims to use blockchain to prove palm oil provenance and hence its sustainability credentials.
